

Give for Hope™

INTERNATIONAL MUSEUM OF SURGICAL SCIENCE

1524 North Lake Shore Drive, Chicago

Friday, October 9, 2026 • 6:30 p.m. - 9:00 p.m.

Give for Hope™ is an evening event dedicated to changing the future for children living with drug-resistant epilepsy. For many families, travel to Level 4 pediatric epilepsy centers can be financially overwhelming. Dreams for Danny, our surgical evaluation travel scholarship, helps families access expert epilepsy surgery care during one of the most critical moments of their child's life. The scholarship program helps reimburse travel expenses and offset costs associated with epilepsy surgical consultations, imaging, EEGs, and other critical testing. Since 2018, more than 150 families have received scholarship support.

The event will bring together families, clinicians, advocates, and community partners for a night of connection, education, and impact. The evening also honors individuals whose leadership and compassion have transformed outcomes for children facing drug-resistant epilepsy.

Every dollar raised helps remove barriers to expert care and gives children a greater chance at seizure freedom and a healthier future.
